

NIEHS Superfund Research Program

Presents

Special Guest Workshop

Date: June 16, 2012 (Sat)

Time: Registration 8-9 am

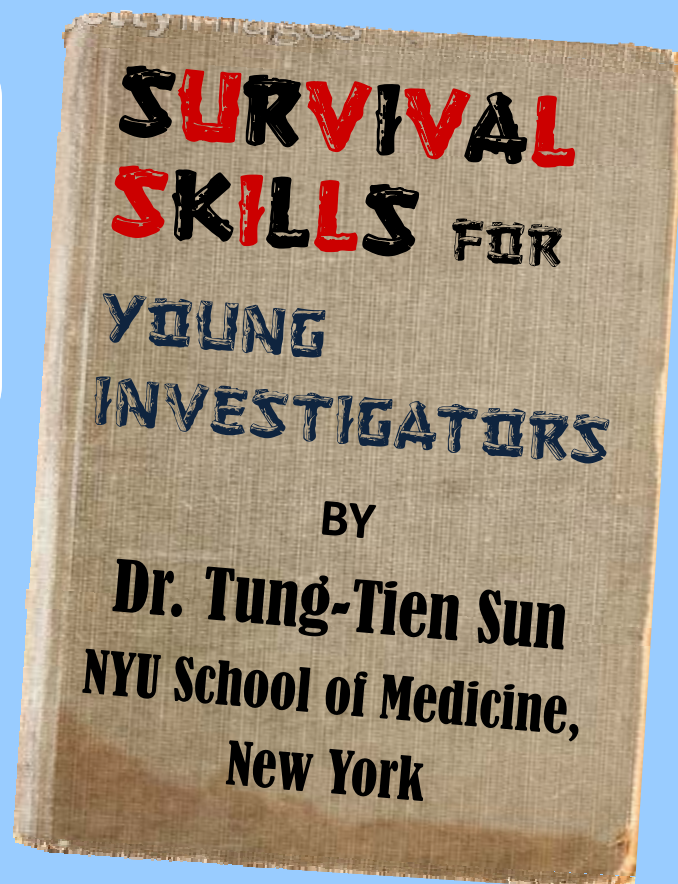

Workshop 9am-4:30 pm

*Location: 1005 Genome Center,
UC Davis*

FREE LUNCH (*pre-registration is required)

Topics to be covered:

- ◎ Experimental Design
- ◎ Scientific Writing
- ◎ Grant Writing
- ◎ Oral Presentation

Dr. Tung-Tien Sun

This 1-day workshop, “**Scientific Methods: Survival Skills for Young Investigators**”, will be presented by Dr. Tung-Tien (Henry) Sun, world-renowned cell biologist and former UCD PhD student. Almost as important as learning the science itself, skills the workshop will cover include: designing experiments, finding reputable sources for your methods, learning from the mistakes of others, developing clear and convincing presentations, performing valuable literature searches and learning writing styles to deliver your message effectively. Developing these skills early in your scientific career can make a big difference.

*Pre-registration is required to receive a free lunch.
